

The route to electronic health records in Canada

October 9, 2018

Jennifer Zelmer (@jenzelmer)

President, Azimuth Health Group

**Better
information
for better
health &
healthcare**

on-going

The journey

INFORMATION IS KEY
TO GOOD HEALTH & CARE

... but healthcare doesn't
look good on paper

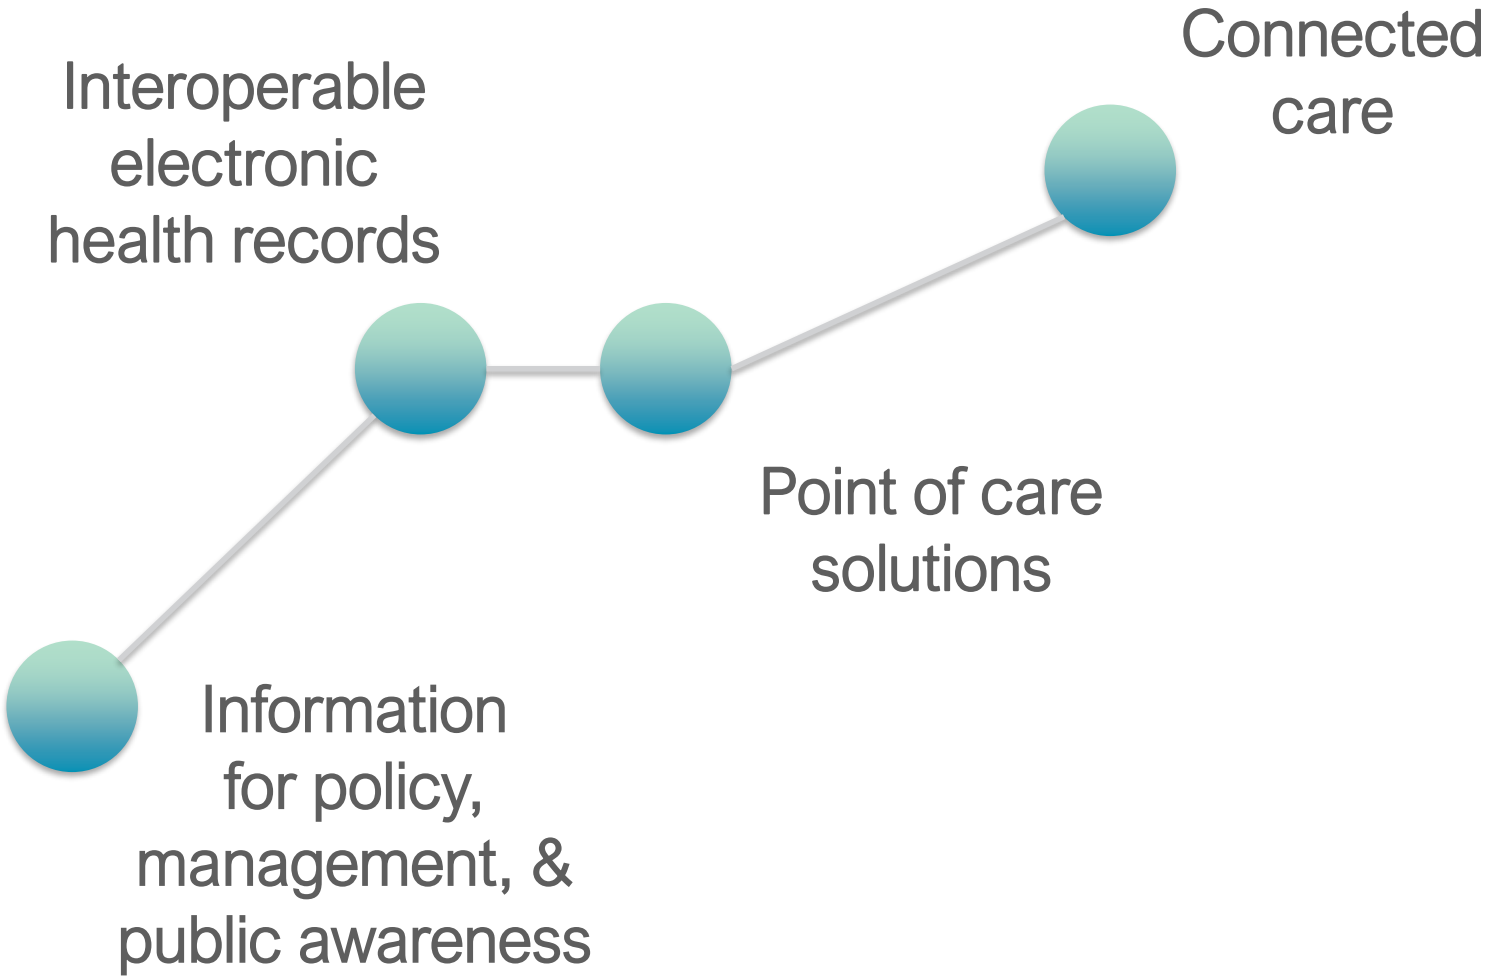

The Digital Advantage: What Canadians Say

96%

keeping health records
electronically important

(Nielsen, 2016)

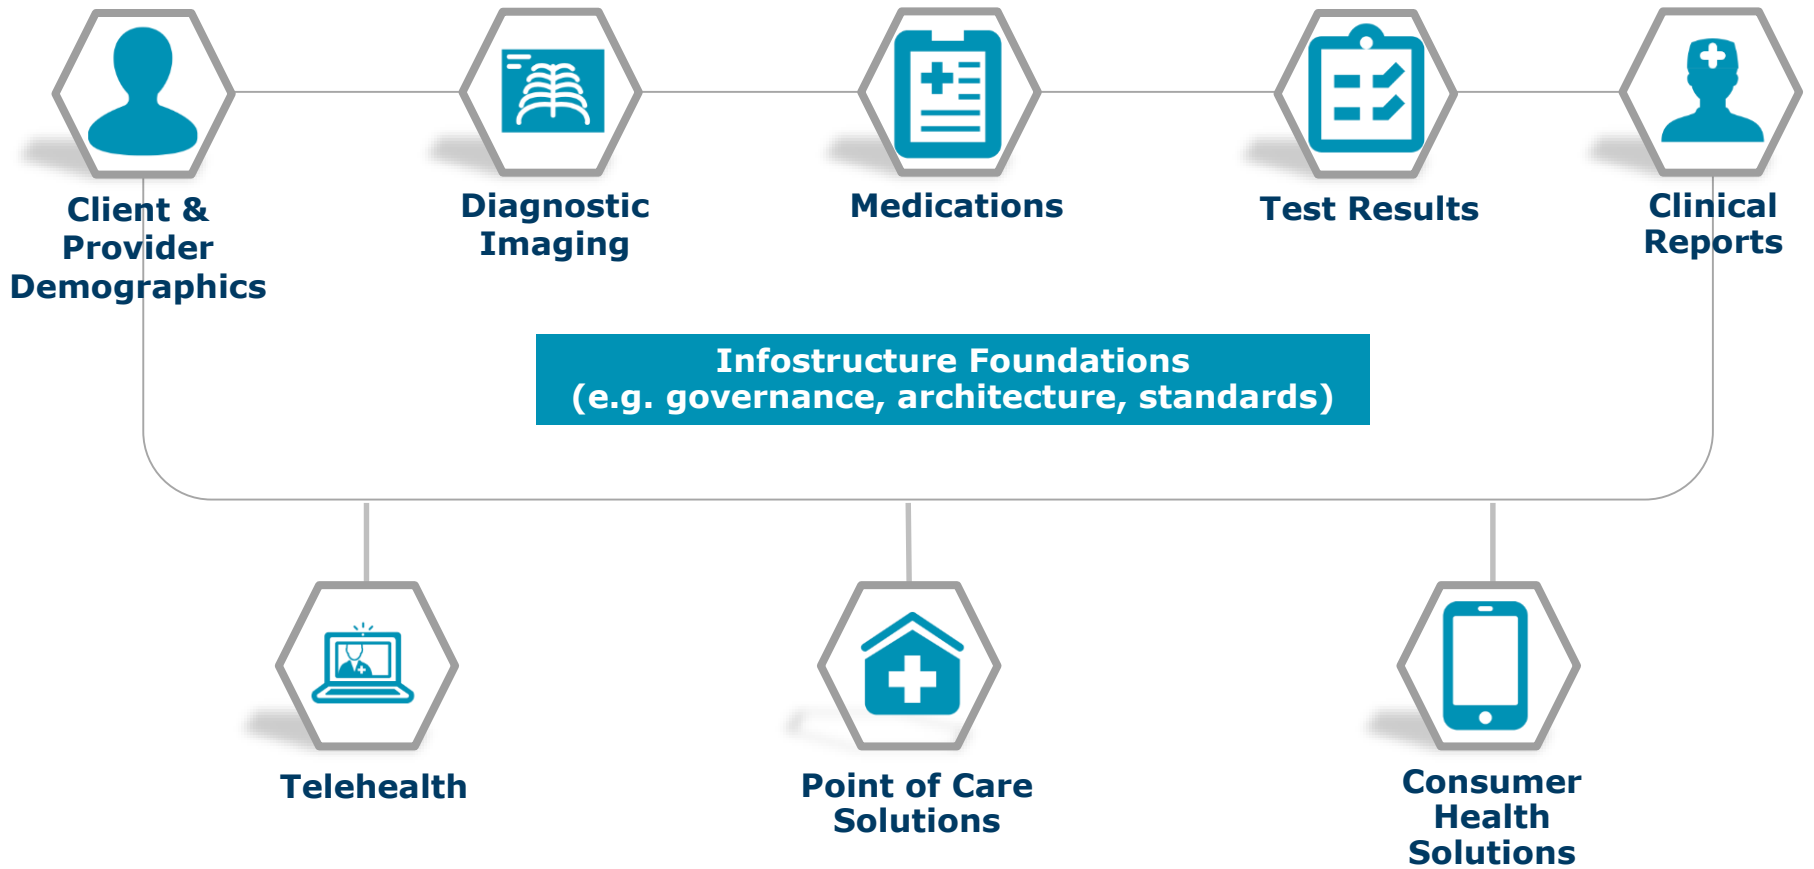

Collaborative Federalism:

“A partnership between two equal, autonomous, and interdependent orders of government that jointly decide national policy”

- Cameron & Simeon, 2002

Unpacking the Process

- Institutional arrangements and governance
- Connectivity & other building blocks
- Building consensus on architecture, standards, and interoperability
- Public and stakeholder engagement
- Change management
- Cooperation across jurisdictional boundaries
- etc.

**Where are
we?**

Primary Care Physicians' Use of EMRs

Data sources: Commonwealth Fund (2006, 2009, 2012, 2015); National Physician Survey (2004, 2007, 2010, 2013 & 2014); Canadian Medical Association Workforce Survey (2017).

Clinicians' use of electronic health records

500,000

Estimated potential
users of EHRs

303,000

Estimated monthly users of
1+ EHR clinical domains

191,000

Estimated monthly users of
2+ EHR clinical domains

Source: Canada Health Infoway, Annual Report, 2017-18

Studies estimate value of access, quality, & productivity benefits at \$26B since 2007

Point-of-Care Systems

- Ambulatory electronic medical records
- Physician office electronic medical records
- Telehealth and telehomecare

Clinical Information Infrastructure

- Connected health information
- Drug information systems
- Diagnostic imaging

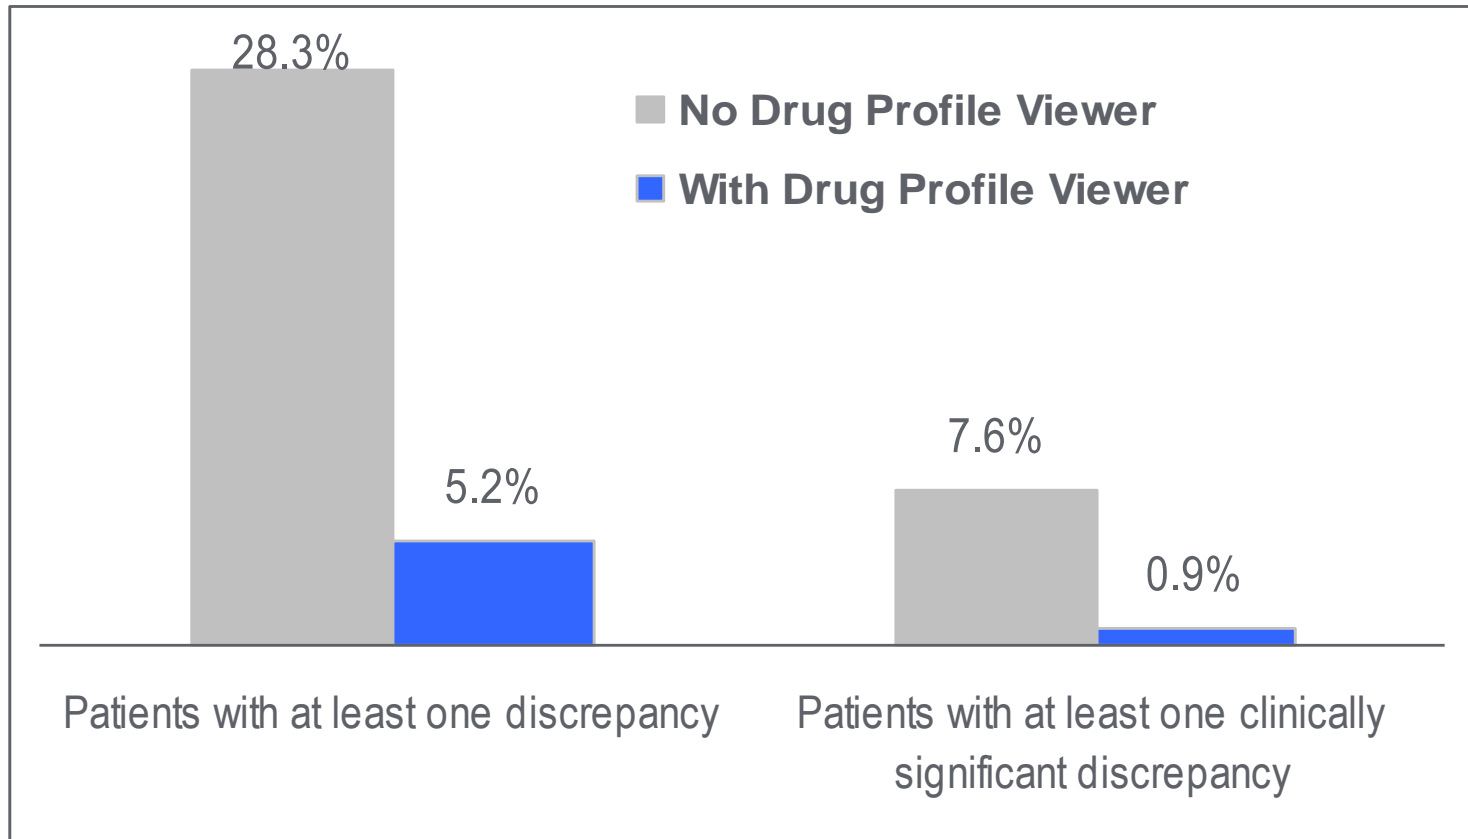

Source: Canada Health Infoway, Annual Report, 2017-18

↑25-30%
radiologists'
productivity

≈ 500 +
specialists
once complete

eMedication Profile helps to avoid adverse events at care transitions: Clinical trial

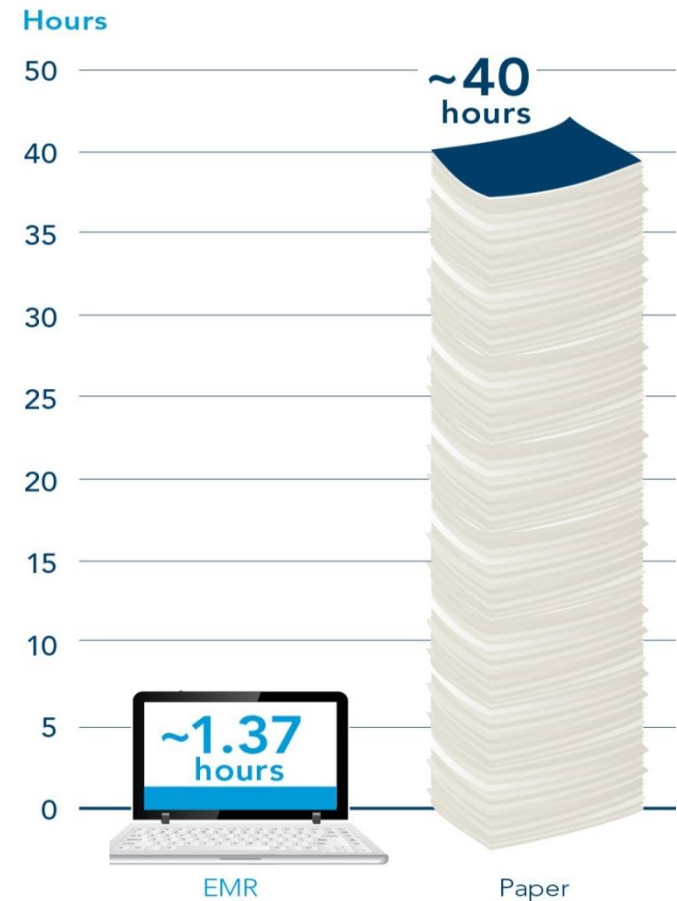

Source: DPV (ON) Benefits Evaluation Study

Impact of a Centralized Provincial Drug Profile Viewer on the Quality and Efficiency of Patient Admission Medication Reconciliation

EMRs Outperform Paper Records for Preventive or Follow-up Care

- EMR practices identified patients who needed 6 types of care more quickly
- Also report higher confidence in results

**PATIENTS WITH ACCESS
TO OWN LAB RESULTS
MORE LIKELY TO ...**

- * Receive results "in a few days":
82% vs 36%
- * Know results of most most recent test:
91% vs 73%

Source: Impacts of direct patient access to laboratory results – Final Report

Lessons Learned

Lessons Learned across Jurisdictions

- There are shared reform agendas
 - Possible to achieve consensus on priorities for collective action
 - Consider appropriate institutional mechanisms and governance
- Flexibility in approaches to achieving common goals is required
 - Perceived value varies across jurisdictions, as does readiness (e.g. connectivity)
- Collaboration, cooperation, and information exchange are achievable in the shorter-term
 - Engagement of a broad range of stakeholders is feasible and speeds change
- Achieving tangible progress on health reform outcomes takes longer and is not guaranteed
- Mechanisms to incent progress can be established where shared goals exist

In the 21st Century, safe care depends on cybersecurity

Cyber resiliency depends on the steps individuals and organizations take themselves, as well as shared action plans

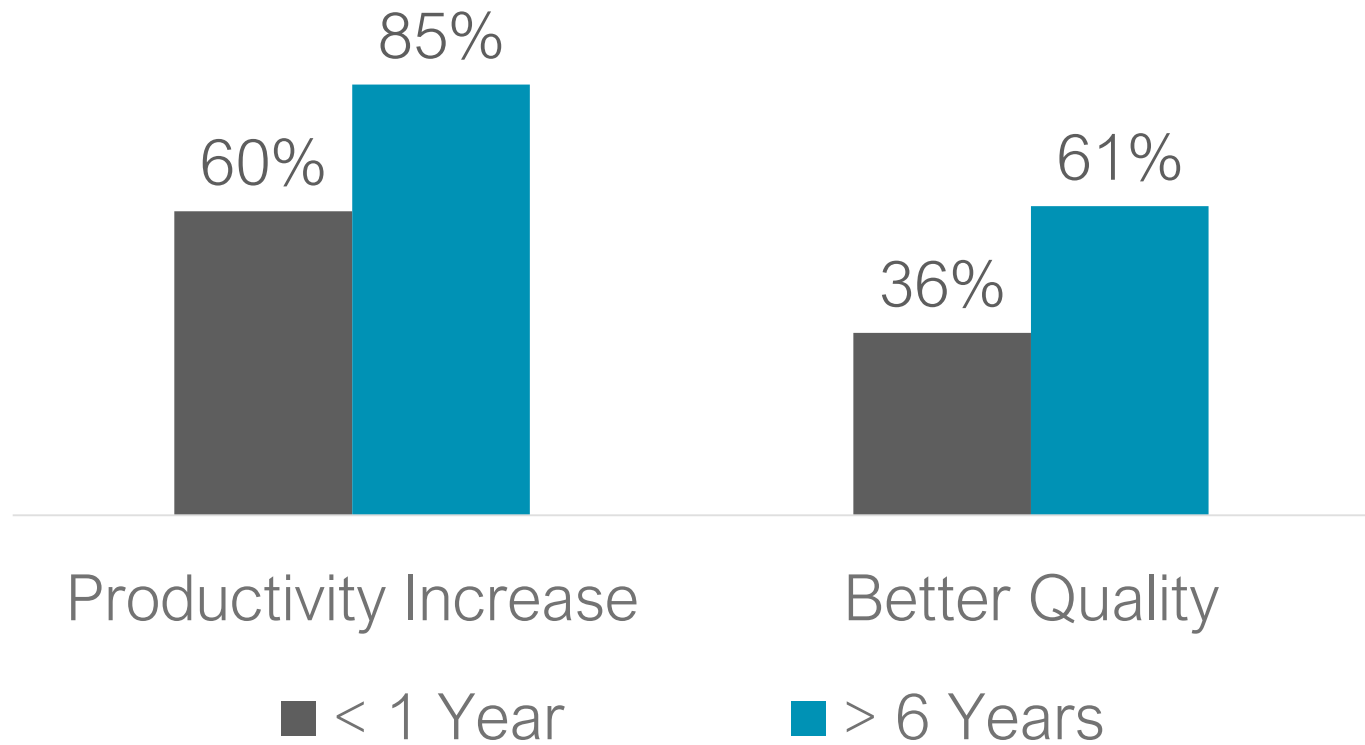

IT'S NOT ONLY - OR MOSTLY - ABOUT TECHNOLOGY.

IT'S A TRANSFORMATIVE CHANGE.

Implementation is the Beginning, Not the End:

% Reporting + Changes by Time since Implementation

Data from National Physician Survey (2014)

Essentials of Change Management
