Three Myths on your Journey

Myth 1

One can build a
national EHR
system

Only 9% of projects
in large companies
were successful.

- Standish Group, 2014

61.5% of all large
company projects were
challenged

- Standish Group, 2014

Cost Overruns	% of Responses
Under 20%	15.5%
21 - 50%	31.5%
51 - 100%	29.6%
101 - 200%	10.2%
201 - 400%	8.8%
Over 400%	4.4%

53% Have 51%+ Cost overruns

Time Overruns	% of Responses
Under 20%	13.9%
21 - 50%	18.3%
51 - 100%	20.0%
101 - 200%	35.5%
201 - 400%	11.2%
Over 400%	1.1%

68% Have 50%+ Cost overruns

% of Features/Functions	% of Responses
Less Than 25%	4.6%
25 - 49%	27.2%
50 - 74%	21.8%
75 - 99%	39.1%
100%	7.3%

In large companies only 42% of the features and functions existed in the end product

Myth 2

Coding Skills are your
most important asset

Don't let enterprise
needs trump users needs

We are not users

I believe the most
important digital
skill is empathy

Your senior public
servants often don't
want to engage users.

Ever.

Engaging users
means having to confront
failure or suboptimal
outcomes.

Myth 3

Open Source
Will Make It Free

Jeremy Kahn's Dev Blog

There's always a method to my madness.

[Blog](#) | [Archives](#)

OCT 19TH, 2014

Open Source Does Not Mean Free Labor

Everyone loves to get something for free. It's just human. Additionally, people have a tendency to maximize the return on an investment as much as possible. When something appears to require no tangible resources from a consumer to produce, said consumer will try to get as much of the potential benefit as they can. Once a limit to the return on free investment is established, or a cost to obtaining the benefit is imposed, reasonable people will respect the rules of the transaction and either pay up or opt out of the transaction altogether.

None of this is new, it's as old as currency itself. Open source is a relatively new concept, and is often misunderstood in a variety of ways. A common misconception is that open source is equivalent to free labor, that users are entitled to having feature requests implemented, and that open source developers owe them something. Essentially, open source has bred a new form

Key Questions

- Who is accountable for:
 - Deciding which users to focus on?
 - User experience/journey?
- What culture do your questions promote:
 - rewarding experiments (MVP) or implementation?
 - Single complaints or data?

Could this type of
innovation take
place in your city?

What conditions
would be required?

Key Questions

- What political cover can you provide?
- Demand Value in exchange for cover
